Direct Admissions Model 3

# Direct Admissions Model 3

Introduction

The **Direct Admissions BI/Query Data Model** allows users to access sets of information pertaining to Direct Admissions applicants such as addresses, qualifications and so on.

The Direct Admissions BI/Query model runs from a set of tables that are updated nightly from the live database, therefore extracted data will be at least 24 hours old. It is very important that queries are well thought out and not over-complicated so that no clashes in the use of the database tables are created.
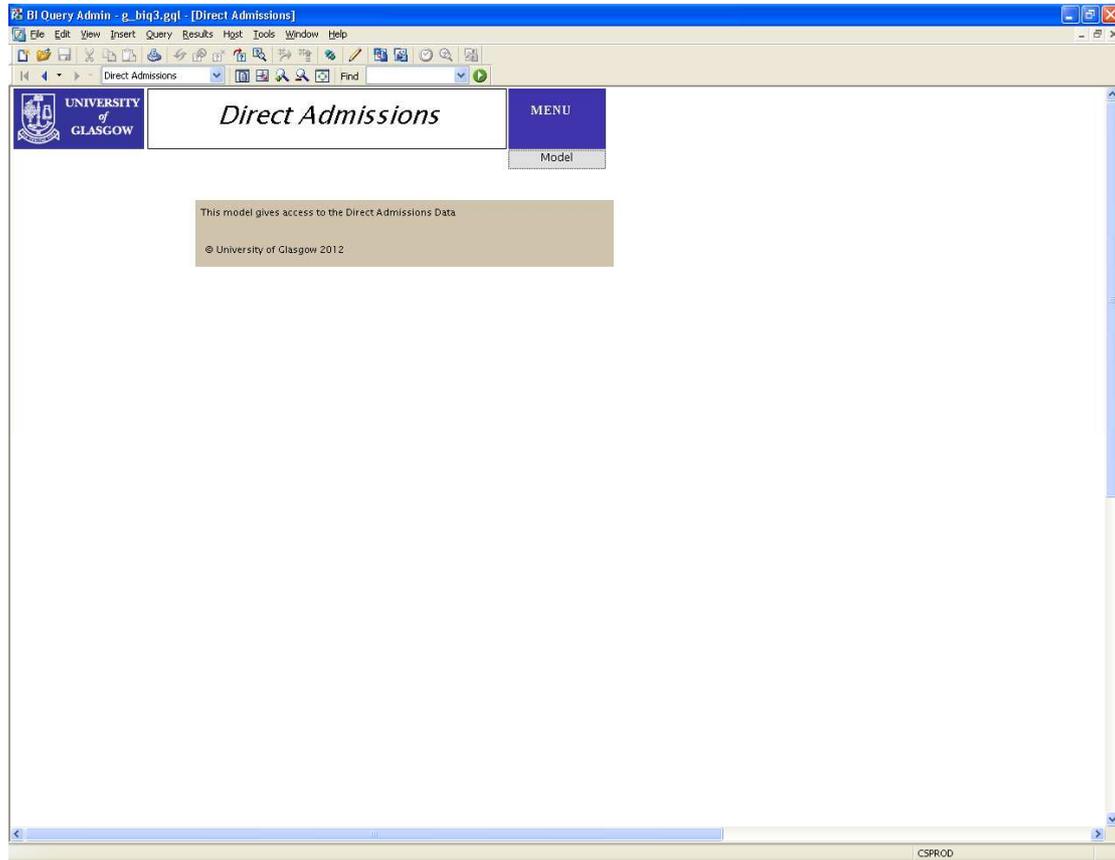

When the model is first opened, the user is presented with the Main Window, which affords access to the model window through the grey button marked 'Model' under the 'Menu' list. The model window allows users to construct their own queries.

For a Version History of the Direct Admissions Model, Please see Appendix A.

Direct Admissions Model 3

A Word of Warning for the use of BI/Query.

BI/Query can prove deceptively simple to use, but care must be taken to ensure you are producing the data that you expect. Try out some examples first where you know the results before submitting the query for real, and confirm that they are correct. Always try and start with simple queries, and build these up into more complex ones, checking at each stage the results are as expected.

A good understanding of the data in the database is essential to using BI/Query efficiently and correctly, and to ensuring that you obtain the correct results.

The Descriptions

The following is a list of all the tables within the data model, together with a description of each of the fields, or attributes, in the table. **Format** gives an indication of what kind of data is held in the field. **C** indicates a Character field and the number following gives the maximum length (e.g. C8 is an eight Character field). **Num** and **Float** are numeric fields. Finally, **Date** indicates an attribute that holds a date; dates should be in the form of dd/mm/yyyy.

Version History

Model 3 (April 2012):

This model has been created as a temporary measure to allow reporting from the MyCampus database while OBIEE reporting is in development.

Version 0 (April 2012):

All user created queries will have to be re-built in this model. It is highly recommended that users upgrade to this model. Time should be taken to become familiar with the changes. Executive buttons created by users for their own use will have to be re-created on the new model.
