"Quotation markets"

Put quotes around search terms to let you search exactly for that word.

All results will have your terms in it.

Example: "James Clear"

Gives you all James Clear search results without just "James" or just "Clear".

FAO Jamie Gallagher

Good morning,

We are hugely looking forward to your appearance at Cheltenham Science Festival and are eagerly preparing to announce the programme next **Friday 23, at 10am**.

We'd welcome your support in announcing your participation in the Festival on social media. You will find some sample copy below which you can feel free to copy and paste or amend as you see fit. We have also created a bank of imagery and videos to accompany your post which you can download from the Dropbox link below.

Please note: This announcement is under embargo until **Friday 23 April, 10am**. Please hold off making any public announcements until then.

Suggested copy: *I'm delighted to announce that I'll be appearing at @CheltSciFest in June. Tickets will be available for LIVE events from May 13 and there will also be a free online live-stream.*

Explore the line-up: www.cheltenhamfestivals.com/science/whats-on/grid

#CheltSciFest #BeTheChange @cheltfestivals

Dropbox link - https://www.dropbox.com/sh/am3lfppmj87a13h/AADY3UTAHQi6mszg2Z-xRuT8a?dl=0

Included in the Dropbox:

- Socials card (sized for Instagram & Facebook, Instagram stories and Twitter)
- Promo video (sized in landscape orientation for Twitter and square for Instagram and Facebook)

If you are able, we'd also love you to post on social media when tickets go on sale to the public on **May 13, 10am**.

Suggested copy: *Catch me at #CheltSciFest in June! Tickets are now on sale here: www.cheltenhamfestivals.com/science/whats-on/grid*

@cheltfestivals @CheltSciFest #BeTheChange

If you have any media appearances booked between the announcement date and the Festival, we would be very grateful if you could mention your event at Cheltenham Science Festival if you get the opportunity.

We are always delighted when speakers post about the Festival on Twitter and Instagram Stories while they are on site with us. If you do, please make sure to use the hashtag #CheltSciFest and tag in @cheltfestivals so that we can like and share.

We're incredibly grateful for your support which makes such a difference in introducing new audiences to the Festival and helping protect its future.

If you have any questions regarding your event, please contact the programmer you've been in touch with. If you have any questions regarding the marketing of your event, please reply to this email.

Best wishes,

Theo Wright

'The Execution of Lady Jane Grey' by Delaroche depicts the chilling moment the 17-year-old Royal was executed #OnThisDay in 1554.

Tap to find out more about one of the most famous paintings in our collection.

Send message

13:01

nationalgallery 19m

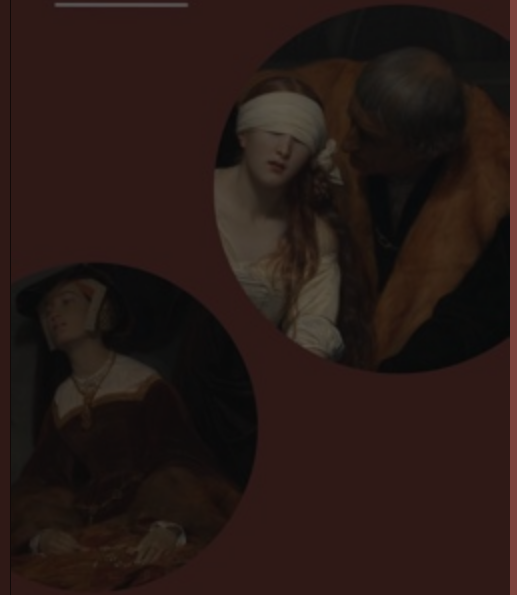
Lady Jane Grey reigned for just nine days as Queen of England following the death of Edward VI in July 1553. Delaroche's choice of subject reflects the French fascination with English culture in the 1820-30s.

Send message

13:01

nationalgallery 19m

Here the helpless Lady Jane is guided to the execution block by Sir John Brydges, Lieutenant of the Tower. Her outer clothing has been removed and is gathered in the lap of a lady-in-waiting, who has slumped to the ground.



Send message

13:01

nationalgallery 19m

Behind her, a second lady-in-waiting stands facing the wall, her arms thrown up in grief and desperation, unable to watch. To the right the executioner ominously stands waiting.

About

First and foremost, I love writing code. Ever since writing my first program in Python and manipulating it to produce a desired output, I have been obsessed with the idea of using software to solve practical problems. Software engineering is a never-ending puzzle that I am passionately engaged in solving. I believe in the power of programming to transform and improve the lives of people around the world.

For my first professional contract, I was given the opportunity to lead a full UI/UX overhaul of a small start up's website. My second contract involved injecting HTML/CSS/JavaScript on popular merchant websites via a browser extension. This contract quickly turned into a full time offer and I have been happily expanding my role as a software engineer ever since. Today, I am a senior engineer at Sling TV working on the front end of our home site, www.sling.com. Most recently, we have been implementing a micro front end into our customer acquisition flow so that it can be dynamically composed using demographic data and allow for CI/CD deployments to bring features to market faster.

Even when I leave the office, I tend to continue writing code at the house. Most recently I have been working on a website for my band, Collidoscope. I play the piano/synthesizer and I find a beautiful crossover between my software and my music. Both pursuits challenge so many aspects of the intellect: creativity, organization, sequential processing, problem solving. This is what keeps me up at night, a never ending thirst to create beautiful, powerful things and share them with the world.

Skills/Interests: JavaScript, Node, React, Redux, Webpack/Babel, StyledComponents, CSS, HTML, Git, GitLab, SQL, PostgreSQL, TDD, Cucumber, Jasmine, Gerkin, wdio, ingnx, Docker

About

I caught fire coding.

I always thought my dream was to be a proofreader for a little indie publishing company, sipping my cafe con leche and reading the opening lines to the next best-selling vampire novel. It seemed like an appropriate dream given my BA in English. I gravitated toward proofreading and quality control positions and even started my own proofreading business. But I kind of just felt meh. I yearned to learn more, yearned to learn something different.

And that's when it happened; the spark I was missing ignited the instant I clicked play on my first Python tutorial video. (I mean seriously, how could it not be great when it's named after Monty Python's Flying Circus?) Since then, I can't get enough. Front-end web development calls to all my passions; it incorporates creativity and problem solving and I'm allowed to break it to improve the code (in a separate Git branch, of course).

I love applying responsive design principles and watching my web pages shrink into mobile screens and still look amazing. It's oddly satisfying. I think in a way I'm kind of like those web pages; I'm moldable, but I still keep my creative flare intact.

My specialties include quickly learning new skills and programming languages, problem solving, domain driven design, responsive design principles, website optimization, and the Model View View Model (MVVM) and Model View Controller (MVC) methods of organizing code. So far I have C#, .Net Framework, SQL, JavaScript, TypeScript, HTML, CSS, Angular, jQuery, Bootstrap, Jasmine, Grunt, Python, and Git/GitHub under my belt. I've started learning React, Node.JS, MongoDB, and Express.JS. I'm still enthusiastically grabbing onto any other programming languages, frameworks, or principles I can integrate into the coding web in my head.
