

What changes are taking place at your HEI?

Increased conversations about SDGs and similar, how to embed in the curriculum redesign in a meaningful way

Responsible business embedded through curriculum

Medium, lots of talk about it, needs to be included in redesigns, things like carbon literacy and esd training available to all

Minimal and medium

Relate daily activities to SDGs and make them visible

I work across several universities - in some places the SDGs have traction. In others other framings like the climate emergency generate more engagement.

More emphasis on minimising cost of delivery

As a post-grad (PhD) I am not quite aware - what I know, I am seeking because of my own research - more needs done

Creating spaces for interaction with society via authentic assessment, for example.

What changes are taking place at your HEI?

New interdisciplinary degrees focused on human health / planetary health; non-teaching focused discussion about being 'green'

Currently embedding, tracking and awarding transformative learning inside and outside the classroom

Offering a bolt-on module to all students; including ESD in curriculum design resources for staff; dedicated staff development route being developed now.

Strategic Plan Base on SDGs covering People Plane and Partnerships

More about creating an image than actually doing something

Thinking about Sustainability in the curriculum Sustainability and Entrepreneurship and enterprise activity Not yet in the realm of transformation

mainly teaching about UNSUSTAINABLE dev

How complete is the process of change in scientific and teaching approaches? Sterling's scale from:
